KUNAL CHAUHAN

Software Engineer | Full-Stack · Django · React · AWS

Palampur, India • +91 7807786372 • kunalchauhan91837@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate (BTech, HPTU '27) with hands-on experience building scalable full-stack applications and REST APIs. Skilled in Python, Django, React.js, and PostgreSQL with proven ability to deliver production-ready solutions in fast-paced environments. Strong focus on backend systems, secure authentication, cloud deployment, and data structures & algorithms.

EDUCATION

Bachelor of Technology — Computer Science & Engineering Aug 2023 – Sep 2027

Himachal Pradesh Technical University (HPTU), India

Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Cloud Computing, Computer Networks, OOP, Discrete Mathematics

Certifications: AWS Cloud Essentials • Cloud Security for Executives • Google Play Store Listing Certificate • Instagram Clone (Cuvette)

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, HTML5, CSS3
Frameworks & Libraries: Django, Django REST Framework, Flask, React.js, Express.js, Tailwind CSS, Bootstrap
Databases & APIs: PostgreSQL, MySQL, MongoDB, RESTful API Design, JWT Authentication
Cloud & DevOps: AWS (EC2, S3, CloudWatch, Lambda), Docker, Git, GitHub, CI/CD, Vercel, Netlify
CS Fundamentals: Data Structures, Algorithms, System Design, OOP, Unix/Linux, TCP/IP, Network Programming
AI / ML: OpenAI API, DialoGPT, NLP, Machine Learning fundamentals, Boto3
Tools: Postman, VS Code, Linux CLI, Figma

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern · *Bluestock Fintech* Apr 2025 – May 2025 | Remote, India

- Built production-grade full-stack IPO Web Application using Django REST Framework, React.js, and PostgreSQL handling real-time financial data.
- Designed secure JWT-based authentication and role-based access control (RBAC) for admin and public user tiers.
- Architected relational database schema across 5+ interconnected entities with cascade integrity constraints and optimized queries.
- Integrated document management system for DRHP/RHP PDF downloads, improving document accessibility for end users.
- Built responsive mobile-first frontend with React.js + Tailwind CSS ensuring cross-browser compatibility across all major browsers.
- Deployed to AWS EC2 + Vercel with environment-based config management and automated production build pipelines.

- Collaborated in Agile sprint cycles using Git/GitHub, participating in code reviews, PR merges, and daily standups.

Web Development Intern · *GrowthLink* Mar 2025 – Apr 2025 | Remote, India

- Developed and deployed 3+ responsive web applications using HTML5, JavaScript, and Bootstrap for client-facing use.
- Improved website performance by 18% through lazy loading, image optimization, and asset minification.
- Resolved cross-browser compatibility issues across Chrome, Safari, and Firefox, reducing UI bug reports by ~30%.
- Collaborated with design and QA teams to deliver pixel-accurate implementations from Figma mockups on schedule.

Freelance Tech Content Creator · *Self-Employed* Dec 2023 – Apr 2024 | Remote

- Authored 20+ technical tutorials on cloud computing, Django REST APIs, and full-stack development for a growing developer audience.
- Grew organic site traffic by 20% through SEO optimization, structured content strategy, and social distribution.
- Managed end-to-end content lifecycle: research, writing, publishing, and performance tracking.

PROJECTS

IPO Web Application | *Django · DRF · React.js · PostgreSQL · JWT · AWS EC2 · Vercel*

- Built full-stack financial data platform for IPO tracking with real-time listings, user auth, and document management system.
- Designed and optimized relational DB schema; implemented REST API endpoints consumed by React.js SPA frontend.
- Deployed scalable production system on AWS EC2 with CI/CD pipeline and Vercel for frontend CDN delivery.

Burger Bot — AI Chatbot System | *Python · Flask · OpenAI API · DialoGPT · NLP · Pyttsx3*

- Built multimodal conversational AI supporting voice + text input using natural language processing techniques.
- Integrated OpenAI API and DialoGPT for context-aware response generation with text-to-speech output pipeline.
- Engineered modular Python architecture — new AI model backends pluggable without refactoring core logic.

Cloud Cost Optimizer | *Python · AWS · Boto3 · CloudWatch · Lambda*

- Automated EC2 scaling policies using Boto3 and CloudWatch alarms, reducing AWS infrastructure costs by ~15%.
- Implemented event-driven Lambda triggers for real-time scaling decisions based on traffic and utilization metrics.

Lost & Found College Management System | *Django · PostgreSQL · JavaScript · HTML · CSS*

- Developed full-stack web platform for 1,000+ university students to report and search lost items, replacing manual tracking.
- Built complete CRUD operations with Django ORM, search/filter functionality, and user authentication system.

ACHIEVEMENTS

- Won internal university hackathon at HPTU — recognized for innovative problem-solving and technical execution.
- Cloud computing project acknowledged by faculty for practical AWS implementation and cost optimization.
- Active open-source contributor on GitHub with consistent commit history across software development projects.
- 31 verified technical skills on LinkedIn across software engineering and cloud development domains.
